Business Continuity & Disaster Recovery

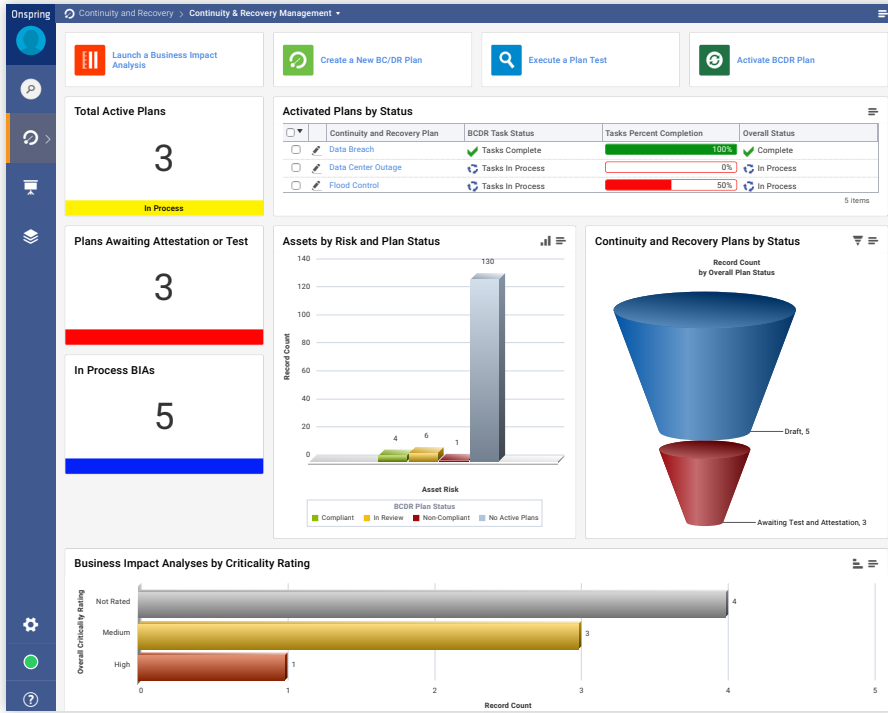

Intelligent Automation & Connected Data Platform

Why choose Onspring for Business Continuity & Recovery?

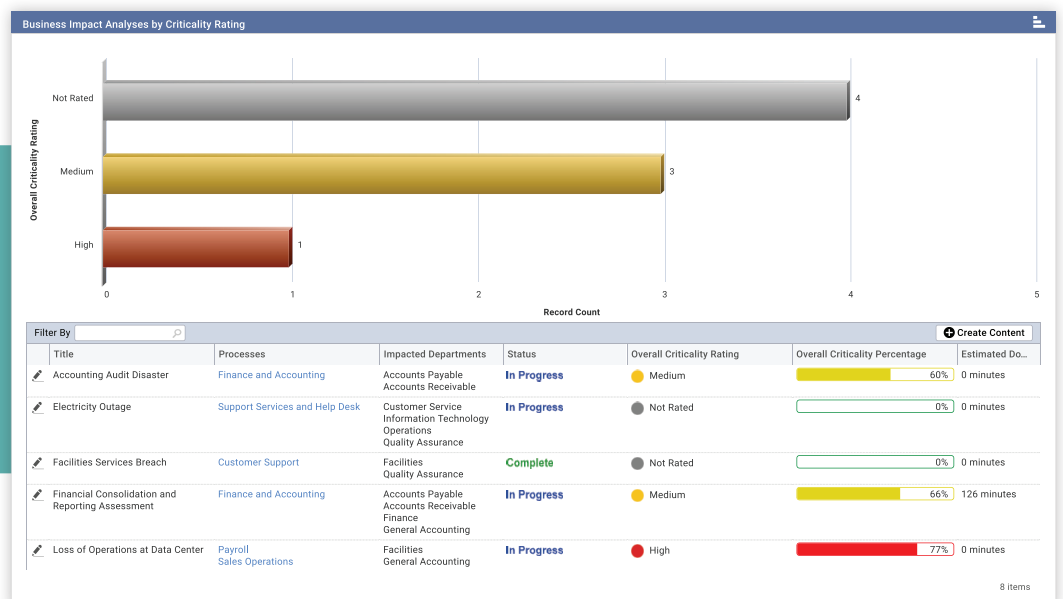

It's the plan that you have in place before a crisis occurs that counts. And that's where Onspring's business continuity and recovery enterprise solution comes in. Designed to protect business operations with actionable recovery strategies, our consolidated process automation and real-time analytics capture, test, and monitor BC/DR plans across your organization.

Using Onspring, you can be ready for anything by proactively planning, rehearsing, and testing continuity initiatives. Gain more accuracy and increase savings using calculations that evaluate in real-time the financial impact and likelihood of disaster scenarios. With automated notifications to email, text and Slack, you can quickly inform team members of their responsibilities during crises.

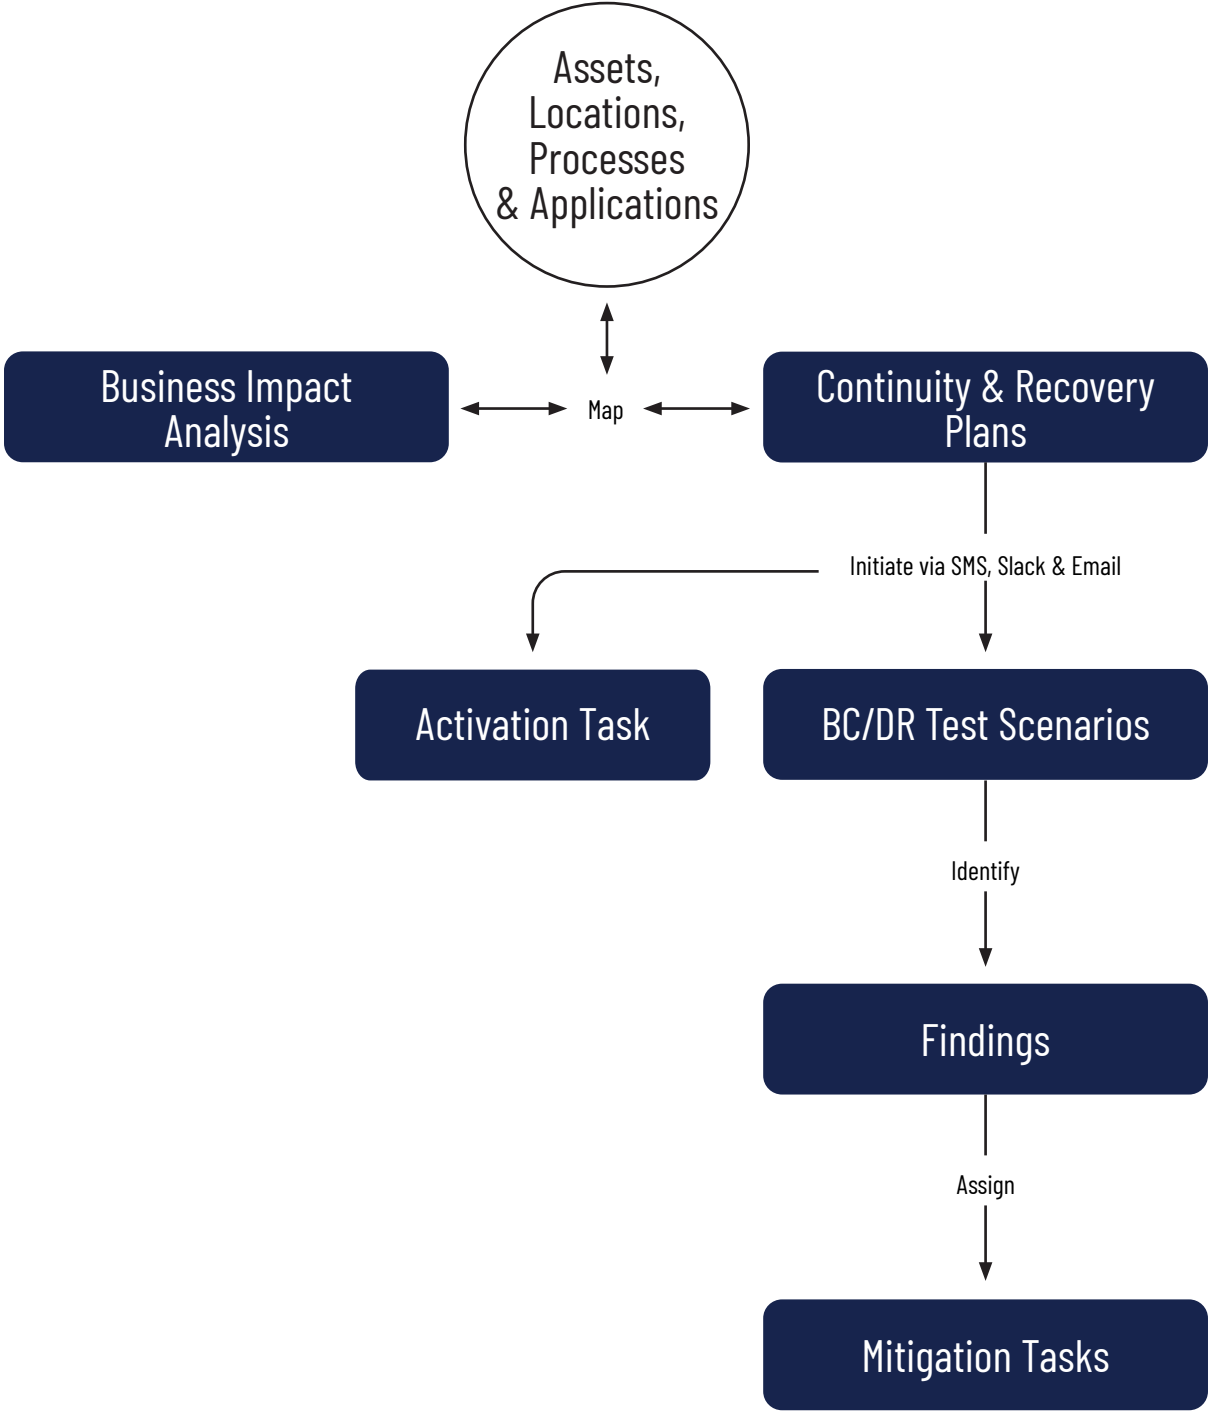

Singular dashboard for execs and business owners to manage all continuity efforts.

Dive into Business Impact Analysis details directly from reports and identify critical applications not covered by a continuity plan.

One Connected System for End-to-End Continuity Planning & Disaster Recovery

Key Benefits for Business Continuity & Recovery

Onspring aligns your enterprise with live views of critical data and people-centered user experiences to enable risk-based business decisions. One system for all policies, controls, assessments & compliance tracking.

- Conduct business impact analyses and map results to related organizations, assets, individuals, and controls.
- Execute scheduled testing of plans to ensure continuity performance is as expected.
- Connect incident and reporting processes to activate continuity plans in real-time.
- Allow BC/DR task owners to manage tasks in personalized dashboards for focus, speed and automated updates to stakeholders.

The Onspring Difference

- ⚡ Omni-data Connectivity
- ⚡ Made to Scale Up & Out
- ⚡ No-code, Self-sustaining Administration

People-powered Platform

Onspring is an autonomous solution. As a cloud-based, no-code platform, Onspring is ready to go out-of-the-box and grows with your needs, adapting to methodologies, maturations, roles and regulations. You can independently run, add, and update our applications on your own to suit your entire enterprise.

Platform Features

Live Reporting

Real-time data aggregation in tables, graphs & maps that drill directly to details

Executive Dashboards

Deliver insights & communicate activities in a role-based command center

Data References

Relate data points to connect impact analyses to assets, locations, controls & personnel

Formulas

Calculate financial implications from business impact analyses & poor test plan performances

Surveys

Send assessments, attestations & surveys on an automatic schedule or ad hoc

Access Control

Set permissions by user to create, read-only, edit & delete

Task Management

Assign individual tasks & track completion by team member, priority & activated or test disaster plan

Integrations

Send alerts through Slack & consolidate third-party monitoring services

Ready-made

Start immediately with out-of-the-box workflows & reports; just add your data

Make it your own

Edit & create new continuity & disaster recovery plans on your own without IT or dev resources

End-to-End Management

Unify all angles of business continuity planning, test evaluations, impact analyses & disaster recovery activation

Connection

Automatically connect data with any team in your enterprise & manage their efforts in Onspring

Real ROI

70%

increase in employee efficiencies

4 days

to implement Onspring and launch your first plan

0 min.

wait to view live status of activated plans

Onspring Customer Success

“We implemented business continuity in Onspring—including migrating legacy data—in four days (rather than over four weeks as planned) in response to COVID-19. Being able to use Onspring for business continuity planning has been a huge win for us and continues to show the value of full platform.”

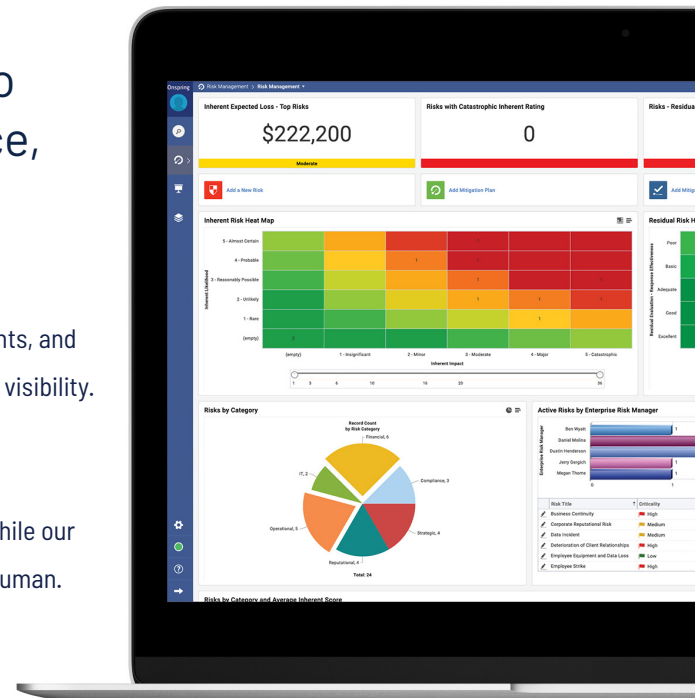

— AMERICAN TRANSMISSION COMPANY

Onspring is no-code process automation software that connects data and teams to improve business intelligence, governance, alignment & resilience.

When people are empowered to create their own workflows, processes, requirements, and reporting, teams are more productive and business runs better. More control. More visibility. More connection. Better decisions.

Onspring is the automation software hundreds of enterprises are built upon. And while our technology continually evolves with business innovations, our approach is always human.
