

Onspring

Business Continuity & Disaster Recovery

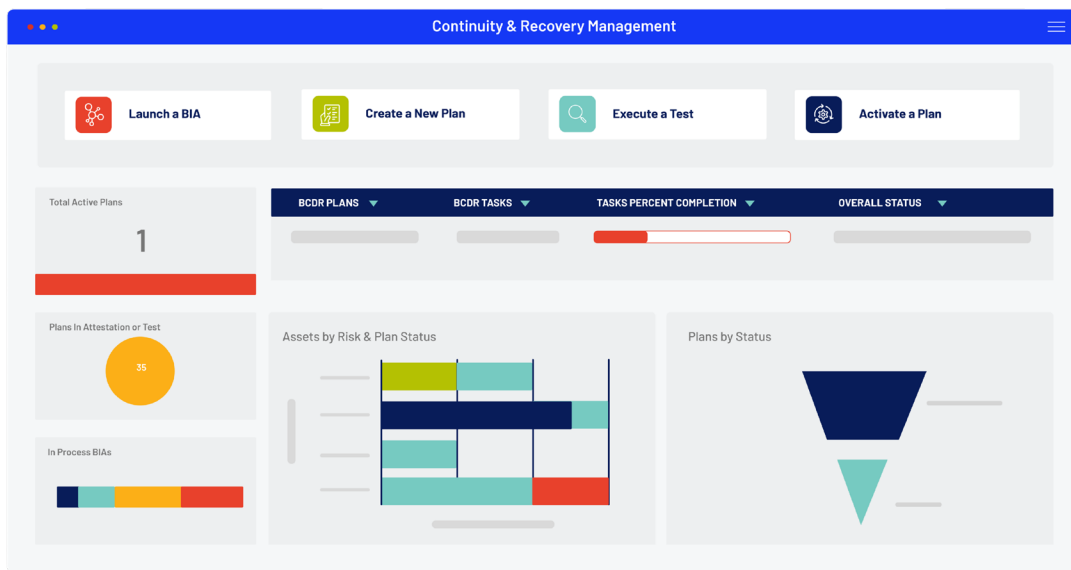

Intelligent Automation and Connected Data Platform

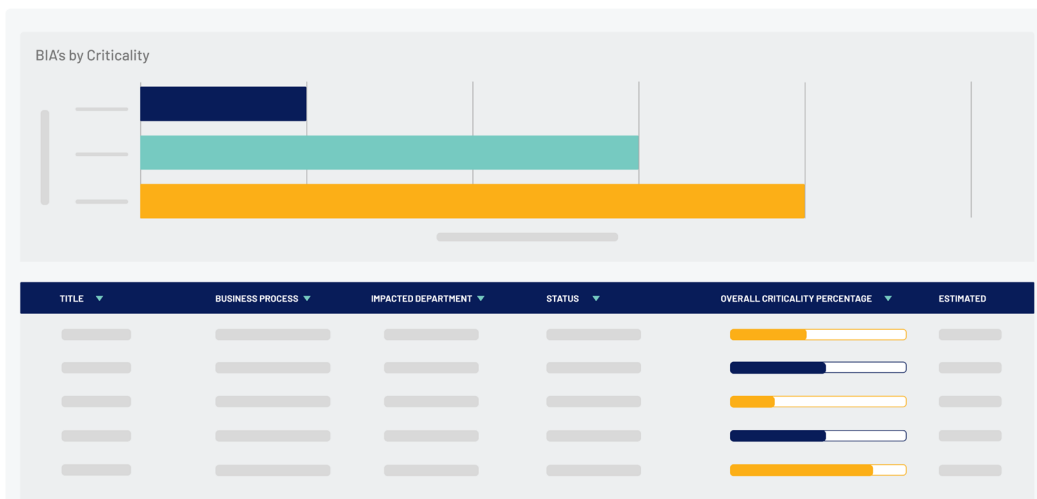

Why choose Onspring for Business Continuity & Recovery?

It's the plan that you have in place before a crisis occurs that counts. And that's where Onspring's business continuity and recovery enterprise solution comes in. Designed to protect business operations with actionable recovery strategies, our consolidated process automation and real-time analytics capture, test, and monitor BC/DR plans across your organization.

Using Onspring, you can be ready for anything by proactively planning, rehearsing, and testing continuity initiatives. Gain more accuracy and increase savings using calculations that evaluate in real-time the financial impact and likelihood of disaster scenarios. With automated notifications to email, text and Slack, you can quickly inform team members of their responsibilities during crises.

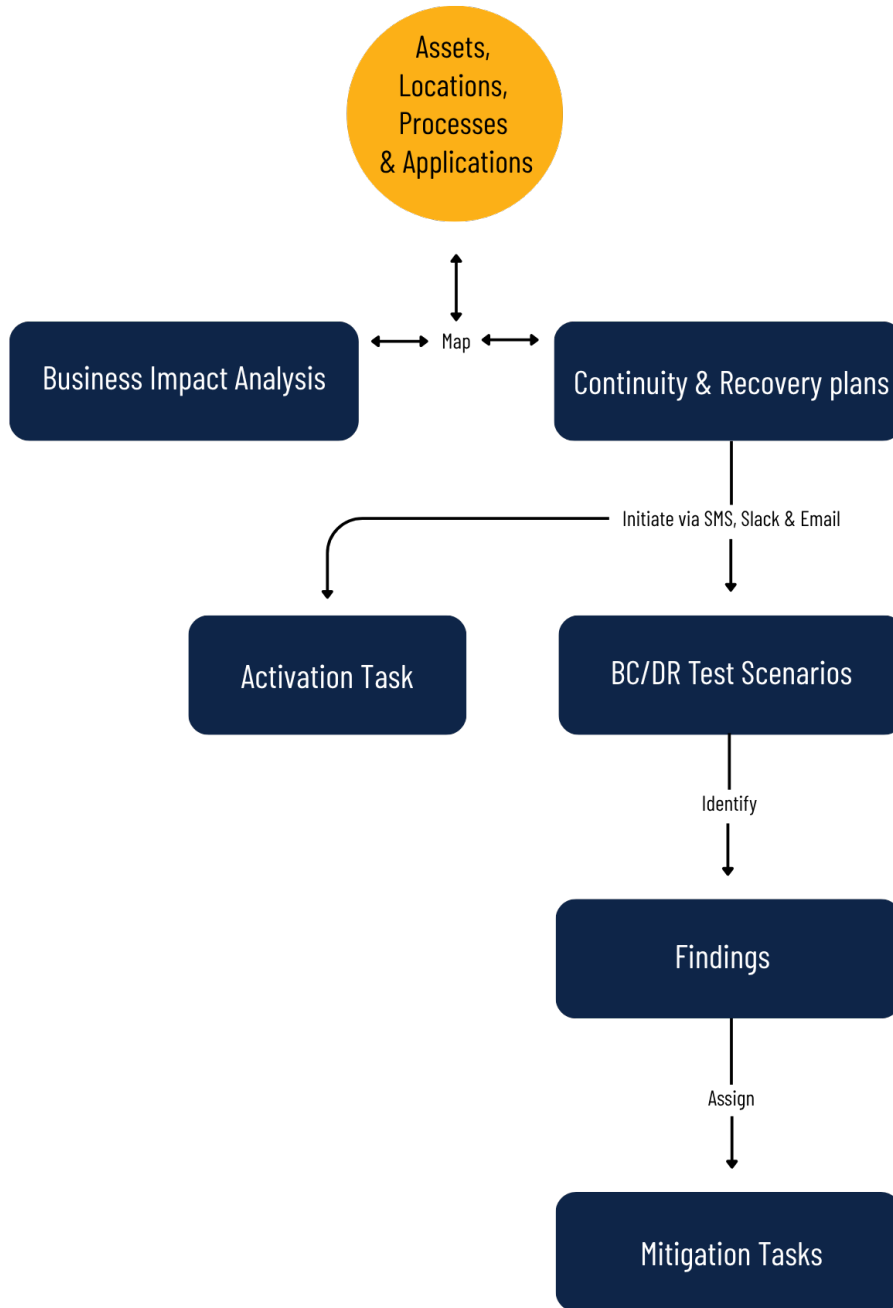

Singular dashboard for execs and business owners to manage all continuity efforts

Dive into business impact analysis details directly from reports and identify critical applications not covered by a continuity plan

One Connected System for End-to-End Continuity Planning & Disaster Recovery

Key Benefits for Business Continuity & Recovery

Onspring aligns your enterprise with live views of critical data and people-centered user experiences to enable risk-based business decisions. One system for all policies, controls, assessments & compliance tracking.

- Conduct Business Impact Analyses and map results to related organizations, assets, individuals, and controls.
- Execute scheduled testing of plans to ensure continuity performance is as expected.
- Connect incident and reporting processes to activate continuity plans in real-time.
- Allow BC/DR task owners to manage tasks in personalized dashboards for focus, speed, and automated updates to stakeholders.

The Onspring Difference

- Omni-data Connectivity
- Made to Scale Up and Out
- No-code, Self-sustaining Administration

An Adaptive, Integrated GRC Platform

Onspring was built to connect processes, data and teams across the enterprise. With real-time visibility into risk posture, security controls and accountability measures, Onspring gives organizations a complete view of their governance, risk and compliance landscape. The platform is fully configurable, allowing users to create automations, unify workflows and scale their programs.

Platform Features

Live reporting

Real-time data aggregation in tables, graphs and maps that drill directly to details

Executive dashboards

Deliver insights and communicate activities in a role-based command center

Data references

Relate data points to impacted policies, controls, requirements, regulations and frameworks

Formulas

Calculate values from multiple data records and APIs to measure real-time status or risk posture

Surveys

Send assessments, attestations and surveys on an automatic schedule or ad hoc

Access control

Set permissions by user to create, read-only, edit and delete

Task management

Assign individual tasks and track completion by team member, due date, budget and priority

Integrations

Consolidate third-party monitoring services and your favorite tech

Ready-made

Start immediately with out-of-the-box workflows and reports; just add your data

Make it your Own

Edit and create new workflows and reports on your own without IT or dev resources

End-to-end management

Unify all angles of your GRC ecosystem to fully assess, prioritize, manage and monitor ever-evolving risks and compliance.

Connected

Connect with any team or any technology in your enterprise.

Real ROI

70%

increase in
employee efficiencies

50%

reduction in
redundant tasks

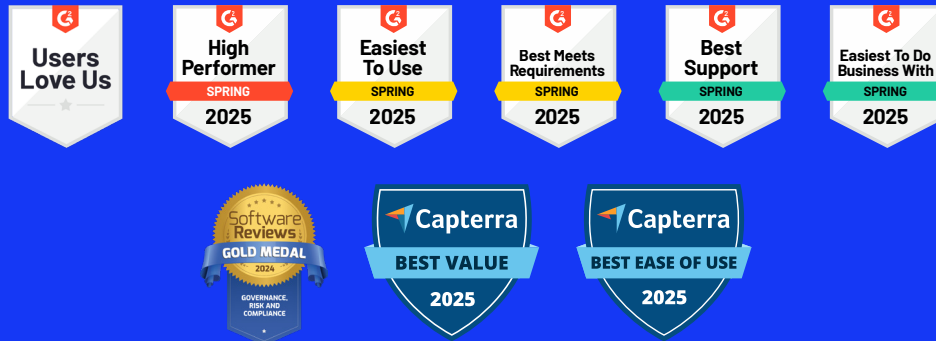

0 min.

wait to update
workflows and reports

Onspring Customer Success

"We implemented business continuity in Onspring—including migrating legacy data—in four days (rather than over four weeks as planned) in response to COVID-19. Being able to use Onspring for business continuity planning has been a huge win for us and continues to show the value of full platform."

– AMERICAN TRANSMISSION COMPANY

Onspring is transforming the way enterprises automate their business processes to stay ahead of risk.

Onspring is a connected, adaptive GRC platform designed to unify processes, data and teams across the enterprise. Achieve comprehensive, real-time visibility into your risk posture, security controls and compliance status, transforming scattered information into actionable intelligence.

Trusted by organizations across diverse industries, Onspring modernizes GRC, moving beyond fragmented, reactive approaches to integrated, proactive oversight.
