

## Your Fastest Way to a Unified View of Third-Party Risk

Directly feed risk monitoring data into Onspring

Connect Onspring to your risk monitoring systems for comprehensive visual representations of third-party risk. Stop compartmentalizing data in separate systems and consolidate everything into one simple view without any code.

Create a faster way to identify which vendors need in-depth reviews.

Establish one system of truth
 by syncing vendor tiers in
 Onspring with vendor list data from your monitoring systems.

Validate vendor flags and conduct vendor assessments using data from multiple sources.

Dictate which monitoring system alerts flow through Onspring and to your users.

DATA CONNECTORS

Add predictive analytics on the financial health of public and private companies from RapidRatings into Onspring.

portfolio for data sync

Set up desired data from RapidRatings, then automap fields to Onspring vendor records.

#### Incorporate findings into your overall vendor risk assessment program

Perform detailed analyses of key data points and evaluate trends and vendors that require further review.

DATA CONNECTORS

Combine data-driven security ratings from BitSight on your vendors to measure your organization's cybersecurity performance within Onspring.

#### Create your BitSight portfolio for easy set up

Design your desired vendor portfolio in BitSight, then map to Onspring using drag 'n drop functionality.

Using formulas, you can pull information out of SecurityScorecard Company Profile records directly into Vendor records in Onspring for analysis and reporting.

#### **Open API = Any Integration**

Our pre-built data connectors are available to help your team manage risk and maintain compliance without extra labor. You must have a valid content license to connect third-party data into Onspring.

#### **Benefits:**

- Collaborate using your favorite tools
- Connect with other teams in their preferred style

#### No-code, Drag & Drop Configuration

No development resources are needed to implement or make changes to your Onspring instance. Literally anyone from your team can build configurations from scratch or make updates.

#### **Benefits:**

- Save time & money
- Put your teams in control

#### **Data Protection & Security**

Define user-based access levels to control data visibility and maintain audit trails of configuration changes and user activity.

#### **Benefits:**

- Save cost to maintain highly secure data
- Keep your data segregated and encrypted

#### **Customer-driven Innovation Roadmap**

Much of Onspring's product roadmap is driven by customer input to ensure the platform supports your business exactly as it needs to.

#### **Benefits:**

- Ask and you shall receive
- New features are designed for you

### Increase the effectiveness & speed of your teams to keep your business running at its best.

We'd be glad to show you around our fully customizable platform. No pressure. No sales gimmicks. Request a personalized demo >
