Onspring

Data Privacy Management Software

Intelligent Automation and Connected Data Platform

Fully Integrated Data Privacy to Mitigate Risk and Ensure Compliance

Data privacy management presents significant challenges to businesses across all industries, regardless of size. In your unique environment, you have an obligation to maintain compliance for customer and organizational data while managing a growing number of privacy risks. This becomes even more critical as regulations proliferate and as the costs of privacy breaches and incidents continue to increase. To stay ahead of this risk, privacy officers and business leaders must ensure robust data privacy processes that are integrated within their broader GRC program.

That's why Onspring provides comprehensive Data Privacy Management software.

One system for all programs, all workflows, all records

It's all about safeguarding organizational data in a way that's integrated within your GRC program and ensuring compliance for you, your customers and third parties.

Data Privacy Workflow

Why Choose Onspring for Data Privacy?

Onspring is designed to help you maintain processes for data inventory, data analysis, and data risks. Onspring Data Privacy Management also provides you with a full view of your data processing activities, program maturity measurements, and trend analysis, while also helping you manage consumer rights requests and customer choices.

From legal compliance with industry- and geography-specific regulations to reputation management that safeguards customer trust and revenue, Onspring offers integrated data privacy tools to manage privacy risks associated with onsite, homegrown, and third-party data processing. Our proactive, dynamic workflows and incident reporting enable your enterprise to fully protect data and securely collaborate, ultimately reducing the cost of doing business.

Data Privacy Management Product Features

Live Reporting

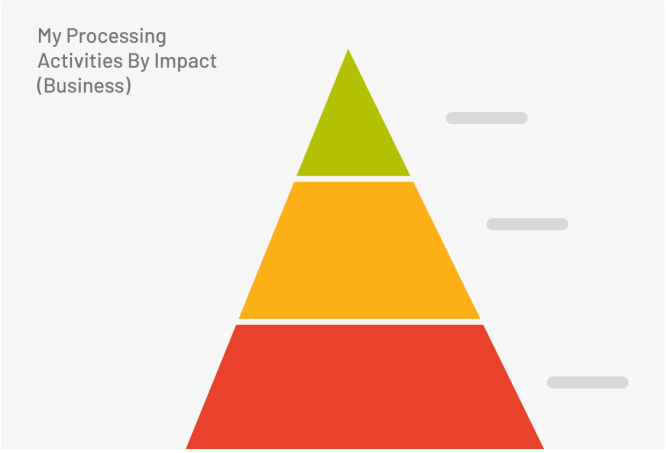
Real-time feedback on compliance and regulatory performance.

Full Visibility

Complete view into the personal data managed by your organization and what is exposed to third parties clearly showing who should and who does have access to data and how it's being used.

PIA Analyses

Conduct concise Privacy Impact Assessments (PIA) with questions relevant to individual respondents.

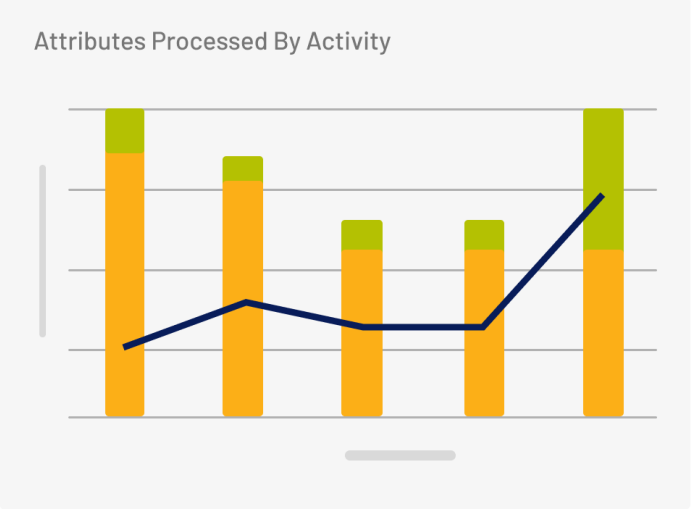


Regulatory Compliance

Provide and complete Data Subject Requests (DSR) to respect customer choices.

Risk Management

Identify and monitor privacy risks associated with assessed business processes and applications.



Key Benefits of Data Privacy Management

The Onspring Difference

- Omni-data Connectivity
- Made to Scale Up and Out
- No-code, Self-sustaining Administration

Onspring supports your data privacy program by providing a secure toolset for sharing data across your organization, with third parties and with clients, enabling you to break down silos and stay in contact on incidents, breaches and remediation — whenever and wherever they may arise. Onspring's data privacy product can also be used to securely share documentation and assign tasks, ensuring streamlined collaboration when it's most critical. Using Onspring's data privacy product, you can:

- Automatically scope privacy impact assessments based on processing activity attributes to maximize analysts' time for remediation efforts.
- Enable your privacy and executive teams to effectively manage the highest priority items using Onspring's repository of controls and regulatory content.
- Remove silos between privacy and third-party analysts so each team knows in real-time what privacy items they need to manage rather than importing information from separate indications.
- Equip the data privacy team to communicate organizational needs more effectively, focusing on ROI, resource utilization, and more.

People-Powered Platform

Onspring was built to connect processes, data and teams across the enterprise. With real-time visibility into risk posture, security controls and accountability measures, Onspring gives organizations a complete view of their governance, risk and compliance landscape. The platform is fully configurable, allowing users to create automations, unify workflows and scale their programs.

Platform Features

Live Reporting

Real-time data aggregation in tables, graphs and maps that that drill directly to details

Executive Dashboards

Deliver insights and communicate activities in a role-based command center

Data References

Relate data points to impacted policies, controls, requirements, regulations and frameworks

Formulas

Calculate values from multiple data records and APIs to measure real-time status or risk posture

Surveys

Send assessments, attestations and surveys on an automatic schedule or ad hoc

Access Control

Set permissions by user to create, read-only, edit and delete

Task Management

Assign individual tasks and track completion by team member, due date, budget and priority

Integrations

Consolidate third-party monitoring services and your favorite tech

Ready-Made

Start immediately with out-of-the-box workflows and reports; just add your data

Make It Your Own

Edit and create new workflows and reports on your own without IT or dev resources

End-to-End Management

Unify all angles of your GRC ecosystem to fully assess, prioritize, manage and monitor ever-evolving risks and compliance.

Connected

Connect with any team or any technology in your enterprise.

Real ROI

70%

increase in employee efficiencies

50%

reduction in redundant tasks

0 min.

wait to update workflows and reports
